Attachments: MN Assumable Waters Analysis 2-1-18 DRAFT.pdf

Kathy,

I wanted to pass this along. Apparently they are making some revisions and were supposed to get that to me Friday – and now maybe today, Ex. 5 Deliberative Process (DP). I don't think the executive summary will change so wanted to get this to you sooner than later. I will also be forwarding you another letter that went to the Corps from the State

Agencies.

Ex. 5 Deliberative Process (DP)

Thanks,
Kerryann

Subject: MN Assumable Waters Analysis Draft Report

Hi Kerryann,

Attached is a draft of the report outlining the Minnesota's attempt to estimate and map retained and assumable waters under a potential Section 404 assumption scenario. A lot has happened since our last project management team meeting, as you will see in the report. We will be presenting the draft report to stakeholders next week (Feb. 7). Doug will be sending it to the full stakeholder group later today.

We may add some definitions and a map or two, format it a little better, and clarify a few things if needed, but we're not anticipating any significant changes. At this point, the report pretty much is what it is. We would, however, be interested in your comments if you have any. We would like to finalize it by February 14 if possible, so if you do have any thoughts, we'd appreciate hearing them before then. Let Doug or I know if you have any questions or would like to discuss.

Thanks!

Les Lemm
